

The Nestle Waters Corporation
is pouring money into advertising as if it were water,
to convince us they are environmental stewards.

HAVE YOU EVER THOUGHT, WHAT WOULD THE NESTLE CORPORATION DO, IF THERE WAS ANY ENVIRONMENTAL HARM DONE BY THEIR WATER MINING OF AN AQUIFER, WHICH IS SO CLOSE TO THE OCEAN?

• YOU MUST HEAR SPEAKER TERRI SWIER, from Michigan, as she explains HOW NESTLE RESPONDED WHEN ENVIRONMENTAL EXPERTS DETERMINED THAT ENVIRONMENTAL HARM WAS BEING DONE BY NESTLE'S WATER EXTRACTION.

Terri Swier, who was featured in the documentary "FLOW", will speak to the citizens in Wells.

Thursday, October 22nd, 7:00pm
at the WELLS ACTIVITY CENTER on Route #109

AND

Saturday, October 24th, 1:00pm
at the WELLS HIGH SCHOOL on Route #1

After 8 years and one million dollars in debt to fight NESTLE, citizens have finally settled with the company to decrease their pumping.

Does your community have that kind of money to throw at a problem, should one arise?

Don't miss this opportunity to hear the truth,
not the marketing hype.
